Art Unit: 1794

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9 depends on claim 8 which has been cancelled, rendering the claim indefinite.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 7,9-10,13-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi (6,615,689) or Suzuki et al (6,177,754) or Lev et al (6,170,156) in view of SU 1151588.

Kobayashi or Suzuki et al or Lev et al disclose the claimed DLC on a gear but does not disclose the claimed steel composition.

SU 1151588 discloses the claimed steel composition used for gears.

Thus it would have been obvious to one of ordinary skill in the art to use the claimed steel composition for the gears in Kobayashi or Suzuki et al or Lev et al

Art Unit: 1794

as these steel compositions are known to be used for gears as shown by SU 1151588.

5. Claims 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kobayashi (6,615,689) or Suzuki et al (6,177,754) or Lev et al (6,170,156) in view of SU 1151588 in further view of Inoue (JP 2000265242).

Kobayashi or Suzuki et al or Lev et al in view of SU 1551588 discloses the invention substantially as claimed except for the explicit disclosure of the claimed thickness.

It would have been obvious to one of ordinary skill in the art to provide for the hard coating with the claimed thickness, as one of ordinary skill would know that within the claimed range would be sufficient to provide the substrate with the desired protection.

6. Applicant's arguments with respect to claims 7, 9-14 have been considered but are moot in view of the new ground(s) of rejection.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
